

Aluminum Foil for Sharpening Scissors

Sharpening Scissors

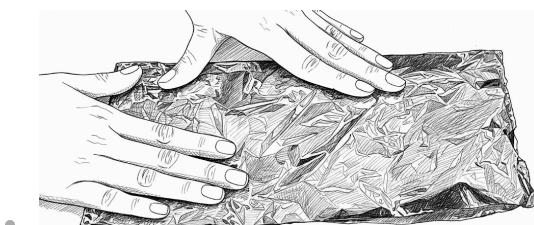

Fold a sheet of aluminum foil several times into a thick strip, then cut through the layered foil repeatedly with the scissors; the abrasive surface of the foil hones the blades, restoring a sharper edge for light cutting tasks.

[Link for more detail](#)

How to Use

1. Fold the aluminum foil several times over

2. Sharpen the blades by cutting the foil in full strokes a couple of times

3. Wipe the blades with a damp cloth

- To remove the metal dust
 - Best for
 - Quick sharpening for cheap scissors.
 - Hard to sharpen tools like hole puncher.
 - Limitation
 - Not recommended to expensive scissors where a professional should sharpen it.

- The sharpen edge does not last as long as a proper sharpening.
